Connor Toale

I am a fullstack developer with 5+ years of educational experience in coding, from back-end such as Java, C++ and Python to front-end Javascript, HTML or CSS, to database management like MySQL or PostgreSQL. I am familiar with Agile methodology, and I'm very comfortable in working with a Scrum master in sprints. I am also adept in AWS deployment.

I am an entry-level developer who is looking to make the most out of my learning experiences from my degree and my coding bootcamp.
